B. Tech.**

**A Unit of Bishnupur Public Education Institute
Address :- Siromonipur, P.O. & P.S. Bishnupur
Dist. Bankura, W.B. PIN 722122**

CERTIFICATE

This is to certify that sewage disposal system of the aforesaid institutional campus is technically and scientifically done. To safely remove and treat nightsoil & wastewater from buildings using decentralized sewer networks on-site systems like septic tank, inspection chamber, soak pit etc. by employing primary i.e. screening & settling secondary i.e. biological treatment and tertiary i.e. nutrient removal processes followed by safe discharge into the environment. A network of underground pipes transports sewage from sources to septic tank, inspection chamber & soak pit. Not only that there are separate system for sewage as well stormwater are carried in separate pipes to avoid overwhelming plants during heavy rain. All covered drains are regularly inspected and cleaned to prevent blockage. As per cleaning interval septic tanks are likely to be desludged by machinery process. Sewage disposal treating sewage to reduce its environmental impact and protect public health.

There are barrier free environment enabling people with disabilities, the elderly and everyone to move, function and access services independently and safely. Design features that allow for self-sufficiency without requiring assistance.

Sufficient toilets technically created for physically challenged persons.

It is further to mention here that for all weather motorable approach roads are constructed with bitumen and concrete that prevent the road from becoming flooded or safe travel without vehicles becoming stuck for all seasons.
